PROFESSIONAL SUMMARY

UI/UX Designer with hands-on experience designing and maintaining consistent, reusable design systems and workflow-heavy interfaces across three end-to-end projects, plus UX annotation and graphic design work. Comfortable working directly with developers in lean, sprint-based teams to hand off designs that are practical to build fast. Focused on speed and clarity over visual complexity, with experience running lightweight usability checks and iterating from real user feedback. Available on a flexible, part-time basis and comfortable scaling engagement up or down with sprint needs.

WORK EXPERIENCE

UX Annotator Intern, Progressive Labs

- Worked on the Watobu product, creating user flow guides for specific websites so users could see exactly how to move through each one.
- Captured screenshots of each page and used bounding boxes to mark every click point, guiding users through the flow step by step.
- Designed graphics for the Nihingo Nepal product as part of the graphic design work.
- Created testimonial designs for Foundery.

UI/UX Design Intern, Herald Development Platform 2025

- Designed mobile app screens for Herald Sync by adapting features from multiple existing Herald platforms into a single, consistent application, working within and extending the project's established design system.
- Presented a UX case study of the HomeEase project, including user research, usability findings, and design decisions, to internal stakeholders.

PROJECTS

MediQ - AI-Powered Medical Appointment Platform | Designer & Developer 2025 - 2026

Final Year Project

- Designed a workflow-heavy, operational product end-to-end in Figma: patient onboarding, AI symptom input flow, specialist recommendation, token-based queue, and appointment confirmation, prioritising speed and clarity for users under time pressure.
- Designed the AI assistant flow that interprets patient-described symptoms and recommends the appropriate medical specialist, removing guesswork and reducing steps to book the right doctor.
- Built and shipped a live web application from the Figma designs, translating the design system directly into working code.

HomeEase - Local Service Discovery App | UI/UX Designer 2025

- Designed a mobile app in Figma connecting customers with local service providers, applying consistent components and accessibility principles throughout.
- Conducted user research and usability evaluations with four participants; delivered user flows, interactive prototypes, and responsive interface designs, feeding findings back into design iterations.

Hamro Doctor - Online Medical Appointment System | Business Analyst & QA 2025

- Led requirements gathering for a team of six, producing an SRS covering functional and non-functional requirements, user stories, and acceptance criteria.
- Performed manual testing, writing and executing test cases, identifying defects, and documenting bugs for resolution.

KEY SKILLS

Design Systems & UI/UX: Figma, Component Libraries, Wireframing, Prototyping, User Journey Mapping, Usability Testing, Responsive Design

UX Annotation & Graphic Design: User Flow Documentation, Screen Annotation, Bounding Box Marking, Promotional Graphics, Testimonial Design

Collaboration & Handoff: Working directly with developers, Agile/Scrum, design-to-build handoff within sprint timelines

Business Analysis: Requirements Gathering, SRS Documentation, User Stories, Stakeholder Analysis

Databases & Cloud: MySQL, Firebase Hosting, AWS S3

Tools: Git, GitHub, VS Code, MongoDB, SQL, Microsoft Office

QA: Manual Testing, Test Case Writing, Bug Reporting

EDUCATION

BSc (Hons) Computer Science, Herald College Kathmandu 2024 - 2027
Affiliated with University of Wolverhampton, United Kingdom

Relevant Coursework: Human-Computer Interaction, Software Engineering, Software Testing, Business Analysis, Web Development, Database Systems, Cloud Computing, Object-Oriented Programming

EXTRACURRICULAR ACTIVITIES

Community Designer, DevOps Pioneer Community 2025

- Designed promotional materials including flex banners and event posters for community events and initiatives.
- Represented the community at DevFest 2026, engaging students through hands-on DevOps-themed activities and explaining core concepts to a non-technical audience.
